The next group will start up in April at a time of their own choosing. Contact Becky and tell her you want to be in a group! [blaskody@gmail.com](mailto:blaskody@gmail.com)

**Planning & Development:** Katy and Paul continue as lead negotiators for weekly meetings with a small and very supportive task force at Centennial Mortgage Inc., our prospective lender. They all met last week for the first time with representatives from US Department of Housing and Urban Development to obtain our go-ahead for the first stage of *formal loan application*. A follow-on meeting will be scheduled soon to give the HUD folks more time to get themselves better oriented. ♦ **Site planning** is mostly in the very capable hands of our site engineers, Bobby Tucker and Nick Lauretta, and is proceeding smoothly. For the latest version of the layout, we have put up a new site layout page under the “Village Design” tab on the website: go [here](#) for more. You’ll see some exciting changes also explained in the text. The new page also includes a link to a [new video](#) made by our own Caleb Buchbinder that features Anthony riffing on the new site plan with a 3D model playing backup! ♦ **Architectural work** is resuming with our Asheville architect, Jonathan Lucas, who is currently working up detailed drawings for the 2BR, 1-story house— needed for the next stage of our loan application. Next up, the Common House!

inquire. ♦ We hosted a very successful afternoon workday on Saturday, March 5, following a lively morning Open House. Several projects promoted CGEV's agrarian goal of aligning ourselves within natural cycles as much as possible. ♦ Michelle and Nell revived **Cob Haven's "green roof"**, adding soil and seeds that will result in more beauty, cooling, and CO2 absorption. Just add rain and sunlight!

♦ Jane Meadows ably led a crew to **inoculate logs with Shitake mushroom spores** which are expected to mature come fall. Thank you, Jane! ♦ Invasive species control continued by hauling dead Ailanthus trees to the **Biochar area**. (Biochar is a slow burning process which converts dead wood into a soil enhancer which we then use as soil amendment.) ♦ Another group marked and lightly cleared a route for an eventual path from the farm to the pond. This path will form the southern edge of the village and include a swale for rainwater retention. ♦ **A hearty thank-you and shout-out to some new people and groups joining in the efforts and fun that day:** folks from the Community Church of Chapel Hill as well as people new to CGEV wanting to get better acquainted. A lot of good conversations going on!

**From Melanie Yukov**

Melanie is offering a Flower Essence Retreat at Maple Spring Gardens in Cedar Grove on Saturday April 30th (which happens to be the new moon!). This is a perfect time to set intentions while making an essence that helps you reach your goals. Flower essences work on the emotional imbalances we all deal with as perfectly imperfect humans. Ever heard of Rescue Remedy? Edward Bach made the magic of flower essences known with his essences. We will have the opportunity to craft our own with flowers at the gardens, and she will have Bach's along with other essences available for us to use. - *Can a process be voluntary while still having an expectation that people will engage with each other?*
- *Is anyone truly neutral? What does it mean to be neutral or impartial as a Helper? What does an impartial process look like?*
- *What does it mean to meet participants' needs for safety?*
